SUCCESS STORY

Drawing and handicrafts' exhibition at El-Rmeyleh Intermediate Mixed School as a part of LEAD after-school activities

El-Rmeyleh Intermediate Mixed School organized in close collaboration with CHF (Cooperative Housing Foundation), RMF (René Moawad Foundation) and the Faculty of Health and Sciences at the University of Balamand (FHS- UoB) drawings and handicrafts' exhibition as a part of LEAD after-school activities.

“It is a nice idea for us to draw and do handicrafts! The work was challenging, thus what we achieved was beautiful!” said Amany Jdouh (10 years old) student in El-Rmeyleh Intermediate Mixed School. Amany was one of 20 students, aged from 10 to 13 years old, who made paintings, drawings and handicrafts, since they're members of the school's Art Club.

As a result, the gifted students produced masterpieces and the school's administration and Fine Arts' teacher organized on Monday May 17th 2010, an exhibition for their works. Students from all classes as well as proud parents and teachers attended the exposition, while the paintings, drawings and handicrafts revolved around education and sciences and their importance and impact on people's lives”

“Each painting or handicraft work carried a message, some countries benefit of education and science in wars and others in peace, these were the paintings and handicrafts' main messages” explained Miss Samar Habbouche, the school's Fine Arts' teacher.

“Although, the time was short, we have learned many things and important works”, stated Racha Jaber (12 years old), member of the school's Art Club, expressing her desire to “always participate in such activities and exhibitions” and asking for “a permanent help to fulfill her wishes”.
